

Dr. Peter David Beter

FORENSIC ANALYSIS OF HUMAN DOUBLES, ORGANIC ROBOTIDS AND SYNTHETICS

Consolidated person-by-person register and classification of replacement identities described in the Audio Letters

Important status: This document records and organizes claims made by Dr. Peter David Beter. The existence of the alleged robotoids, synthetics, or replacement operations is **not established here as historical fact** unless independently documented. The purpose is to separate Beter's narrative, terminology and chronology from independently verifiable evidence.

1. Key distinction between the three categories

Human double: A real human being allegedly used as a physical or public substitute for another person. Beter describes examples involving plastic surgery, behavioral training and extensive study of the original person's mannerisms.

Organic Robotoid: Beter's term for an artificial living biological being allegedly developed by the Soviet/Russian side. In Beter's description it was not simply a mechanical robot and was intended to reproduce the appearance and behavior of a specific human.

Synthetic / Synthetic Automaton: Beter's term for a separate artificial-life technology that he associated with the American/Bolshevik side. He presented it as a counter-development to the Russian Organic Robotoid program.

These definitions are **Beter's terminology**. They should not be confused with established modern scientific categories.

2. Consolidated person-by-person register

Person / group	Count / evidence	Copy numbers / identification	Type	Origin according to Beter	Audio Letters
Jimmy Carter	16 + 1	No. 2–17 Organic Robotoids; No. 18 Synthetic	Robotoid + Synthetic	Russian/Soviet; later American/Bolshevik	AL 46, 48, 51
Rosalynn Carter	2+	At least No. 2; other Carter-family robotoids	Robotoid	Russian/Soviet	AL 46, 48
Amy Carter	1+	No stable individual number	Robotoid	Russian/Soviet	AL 46
Billy Carter	1+	No stable individual number	Robotoid	Russian/Soviet	AL 46
Lillian Carter	1+	No stable individual number	Robotoid	Russian/Soviet	AL 46
Hugh Carter	1+	Family group	Robotoid	Russian/Soviet	AL 46
Walter Mondale	min. 3	Multiple	Robotoid	Russian/Soviet	AL 46+
Nelson Rockefeller	2	Two replacement identities	Robotoid / double	Phase-dependent	AL 42, 46+
David Rockefeller	min. 2	No. 2 explicit + earlier double	Robotoid	Russian/Soviet	AL 46
Laurance Rockefeller	min. 1	Double / replacement	Robotoid / double	Russian/Soviet in later scheme	AL 42+
Gen. George S. Brown	1 human + failed attempt	Failed U.S. robotoid attempt; human double at Congress	Human Double	American human double; CIA robotoid attempt	AL 46
Harold Brown	2	Multiple; no stable number in this register	Robotoid	Russian/Soviet	AL 46, 48
Cyrus Vance	Multiple	No. 3 and No. 4 explicit, plus earlier replacement	Robotoid	Russian/Soviet	AL 46
Zbigniew Brzezinski	1	One robotoid	Robotoid	Russian/Soviet	AL 46
Michael Blumenthal	1	One robotoid	Robotoid	Russian/Soviet	AL 46
James Schlesinger	1	One robotoid	Robotoid	Russian/Soviet	AL 46
Anwar Sadat	1	Replaced by robotoid	Robotoid	Russian/Soviet	AL 46
Menachem Begin	1	Replaced by robotoid	Robotoid	Russian/Soviet	AL 46

Person / group	Count / evidence	Copy numbers / identification	Type	Origin according to Beter	Audio Letters
Jody Powell	1	One robotoid in broader replacement circle	Robotoid	Russian/Soviet	AL 46+
Frank Church	1	One robotoid	Robotoid	Russian/Soviet	AL 46+
Stansfield Turner	1	One robotoid	Robotoid	Russian/Soviet	AL 46+
Barry Goldwater	1	Robotoid public representative	Robotoid	Russian/Soviet	AL 48
Henry M. Jackson	1	Robotoid public representative	Robotoid	Russian/Soviet	AL 48
Malcolm Toon	1	Robotoid public representative	Robotoid	Russian/Soviet	AL 48
Brezhnev	1 human + other(s)	Brezhnev No. 2 human double; later layers	Human Double / other	Russian/Soviet context	AL 48
Pope John Paul II	2+	Actor pope human double; later another Russian double, type unclear	Human Double + unclear	Bolshevik then Russian	AL 42, 46, 55
Cardinal Benelli	1+	Bolshevik double, then later another double	Human / unclear	Bolshevik then Russian	AL 46
Shah of Iran	1	Synthetic in David Frost interview according to Beter	Synthetic	American/Bolshevik	AL 53
Ayatollah Khomeini assassination / attacker double	1	Human double according to previous register	Human Double	Unspecified	AL series
U.S. Supreme Court members	9	Group claim: all 9 members as robotoid replacements	Robotoid	Russian/Soviet	AL series

3. Jimmy Carter — the most explicitly numbered sequence

Beter's Carter narrative is unusually detailed. In AL 46 he describes a sequence of Carter replacements and states that Carter No. 2 and No. 3 were Russian Organic Robotoids. The sequence later expands through numbered Carter identities.

By AL 51, Beter describes Carter No. 18 as a separate Synthetic rather than an Organic Robotoid. This is the clearest example in the Audio Letters of Beter distinguishing the two artificial technologies.

The register therefore records **16 Organic Robotoids (No. 2–17) plus Synthetic No. 18** as Beter's numbering scheme. This should not be interpreted as independently verified evidence that 17 replacement bodies actually existed.

4. Cyrus Vance — numbered robotoids

AL 46 gives one of the clearest examples of numbered replacement identities for a senior U.S. official. Beter refers to Cyrus Vance replacements including **Vance No. 3** and **Vance No. 4**, and describes earlier replacement activity as well.

For that reason the consolidated register uses **multiple** rather than forcing a precise total beyond the explicitly numbered identities.

5. Carter family

Beter's AL 46 account extends the replacement narrative beyond Jimmy Carter. He names Rosalynn Carter, Amy Carter, Billy Carter, Lillian Carter and Hugh Carter among the alleged replacements. The Audio Letter does not provide a stable, complete numerical register for every family member, so the table uses '1+' rather than inventing exact counts.

6. Political and military officials

Beter's account places Organic Robotoids throughout the U.S. political and national-security establishment. Among the names appearing in the consolidated register are Walter Mondale, Nelson Rockefeller, David Rockefeller, Laurance Rockefeller, Harold Brown, Cyrus Vance, Zbigniew Brzezinski, Michael Blumenthal, James Schlesinger, Anwar Sadat, Menachem Begin, Jody Powell, Frank Church, Stansfield Turner, Barry Goldwater, Henry M. Jackson and Malcolm Toon.

General George S. Brown is a special case: Beter described an alleged failed U.S. attempt to produce a robotoid of Brown, followed by a human double. This is therefore classified separately from the Russian Organic Robotoid claims.

7. Vatican and Pope John Paul II

Beter's Vatican narrative changes across the Audio Letters. AL 42 describes Pope John Paul II as an actor and alleged human double. Later material describes another Russian replacement and does not always specify whether the later figure was a human double or a robotoid.

The register therefore deliberately uses **2+** and distinguishes the human-double phase from the later, less clearly specified phase. Cardinal Benelli is treated similarly.

8. U.S. Supreme Court — group claim

Beter also made a group-level claim concerning the nine members of the U.S. Supreme Court. The register records this as **9 alleged robotoid replacements**, but does not attempt to assign individual replacement numbers where the underlying material does not provide them.

9. Shah of Iran

In AL 53, Beter claimed that the person presented as the Shah during a David Frost interview was not the Shah and was instead a **Synthetic Automaton**. He explicitly contrasts this technology with the Russian Organic Robotoid program.

10. Counting methodology — why the total is approximately 56–57

A simple arithmetic total is misleading because Beter sometimes counted numbered successive replacements, while elsewhere he described a group of people without assigning individual numbers. In addition, some identities appear in more than one technological phase.

Accordingly, the current consolidated register should be understood as approximately **56–57 replacement identities / evidentiary cases**, depending on whether repeated numbered replacements, family members, group claims and later replacement layers are counted as separate cases.

This is **not a claim that 56–57 replacements have been historically proven**. It is a bookkeeping estimate of the cases described in the present Beter-source register.

11. Proposed final AL 1–80 master register

For a definitive version, the next step is a letter-by-letter master register covering Audio Letters 1–80. Each entry should contain: (1) Audio Letter number, (2) date, (3) person named, (4) exact wording of Beter's claim, (5) copy number if given, (6) claimed type, (7) claimed origin, (8) event/date associated with the replacement, (9) independent historical record, and (10) evidence status.

This structure will allow the project to distinguish three different questions: **what Beter actually said; what contemporary public records show; and whether the two can be reconciled, contradicted, or remain unresolved.**

12. Source and evidentiary note

Primary Beter material consulted for the classification includes Audio Letters 42, 46, 47, 48, 51, 53, 55, 63 and 70, together with the published Beter books and Audio Letter index.

The core source archive is hosted at **peterdavidbeter.com**. The claims in this document are attributed to Beter unless a separate independent source is explicitly cited.

This document is therefore a **forensic research register**, not a declaration that Beter's claims are established historical fact.
